“The motion of the economy, unlike that of heavenly bodies, conforms to no immutable mathematical laws and follows no repetitive patterns (p. 66)”

David Glasner (economist at the Bureau of Economics, U.S. Federal Trade Commission) has assembled a stellar cast who have written an exceptionally useful reference book. *Business Cycles and Depressions: An Encyclopedia* includes 327 original articles on every major aspect of business cycles, fluctuations, financial crises, recessions, and depressions. The articles, which range from macroeconomic theory to econometrics to the historical record, are generally up-to-date, clear and to the point. Most entries will be accessible to students, but are informative enough to benefit almost any professional, as well. Each includes a bibliography. A seven-page appendix presents international data detailing business cycle turning points and durations. Perhaps the highlight of the volume is a ten-page entry, “Business Cycles” by Victor Zarnowitz, which surveys the entire field of business cycle research and is quoted above.

EH.Net subscribers will find this work especially helpful. The encyclopedia includes biographies of dozens of economists. (These entries focus almost entirely on the individual’s contributions to the understanding of business cycles. The biography of W.W. Rostow, for example, only briefly mentions his work in the Kennedy and Johnson administrations and says little about his writings on economic growth.)

The subjects of these biographies include: Moses Abramovitz, Maurice Allais, Luigi Amoroso, James Angell, Walter Bagehot, Otto Bauer, Eduard Bernstein, Eugen Bohm-Bawerk, Arthur Burns, Richard Cantillon, Carl Cassel, John Commons, Charles Coquelin, James Duesenberry, Otto Eckstein, Friedrich Engels, Irving

Fisher, Milton Friedman, Ragnar Frisch, John Fullarton, Richard Goodwin, Tygve Haavelmo, Gottfried Haberler, Alvin Hansen, Roy Harrod, Friedrich Hayek, John Hicks, Rudolf Hilferding, John Hobson, David Hume, William Stanley Jevons, Nicholas Kaldor, Michal Kalecki, Karl Kautsky, John Maynard Keynes, Charles Kindleberger, Lawrence Klein, Nikolai Kondratieff, Tjalling Koopmans, Simon Kuznets, Oskar Lange, Frederick Lavington, Abba Lerner, W. Arthur Lewis, Erik Lindahl, Eric Lundberg, Rosa Luxembourg, Thomas Malthus, Alfred Marshall, Karl Marx, Lloyd Metzler, John Stuart Mill, Frederick Mills, Hyman Minsky, Ilse Mintz, Ludwig von Mises, Wesley Mitchell, Franco Modigliani, Gunnar Myrdal, Bertil Ohlin, Arthur Okun, Vilfredo Pareto, Henry Parnell, Warren Persons, A.
